

How to Use the Staff Wars Live App

This is a really cool app to use in your home practice, esp. if you are struggling with reading your notes quickly. It is like a video game where you shoot music notes. In the Staff Wars Live version you **play** the note to make it explode!

This guide will show you how to install and use **Staff Wars Live**. You do need to purchase this app and it may only be available on apple devices so please speak to your parents/guardians before going ahead.

1. Search for Staff Wars Live in your app store then purchase the app.

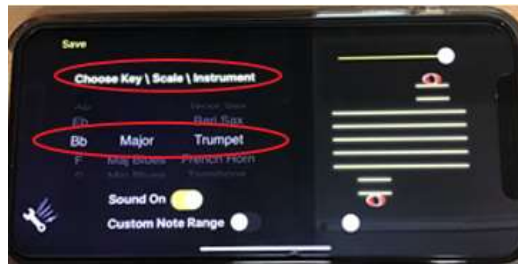

2. Once it is installed on your device, open it. Click "Ok" to allow access to the device microphone.

3. Click settings.

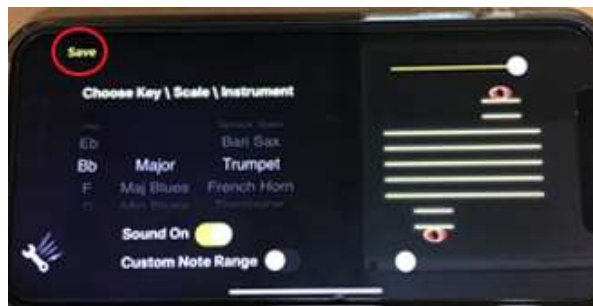

4. Scroll the 'Key' column until you find your instrument scale (e.g. Bb for Flutes or C for trumpets). Leave the 'Scale' column on Major. Scroll the 'Instrument' column until you find your instrument.

5. Move the highest note to the highest note you can play on your instrument. Move the lowest note to the lowest note you can play on your instrument.

6. Once you have finished, click "Save" in the top left hand corner.

7. You will go back to the entry screen. Select the clef (treble or bass) that you play then the game will open.

8. When you are ready, press "Start."

9. Notes will appear on the screen. Play the note at the correct pitch and it will explode. You can't let the note get to the clef!

10. Click stop when you want to stop the game.
